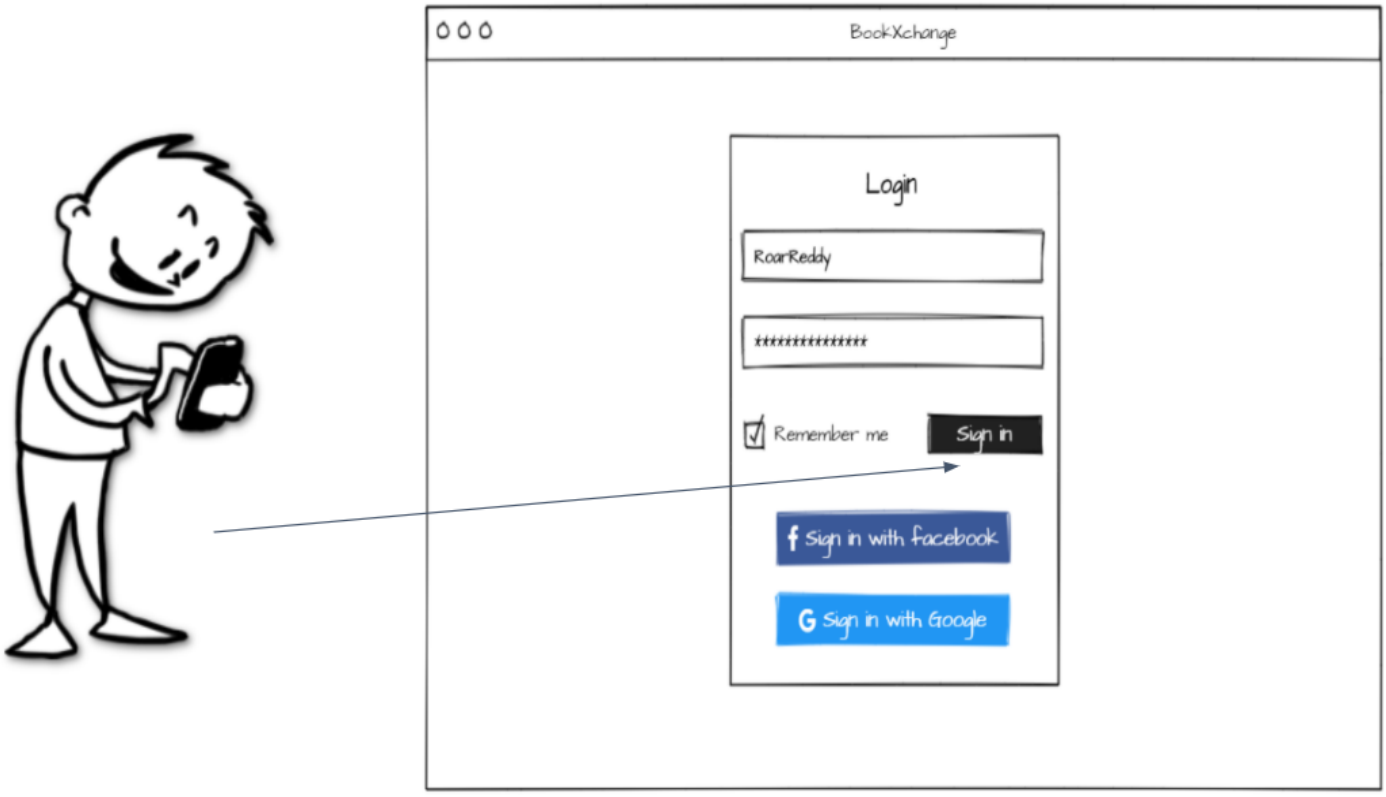
STORYBOARDING

Rohan is a first year student of an engineering college. He is unable to afford the required textbook Engineering Chemistry. In addition to this, he also knows that he will no longer be requiring this textbook after the first year has completed.

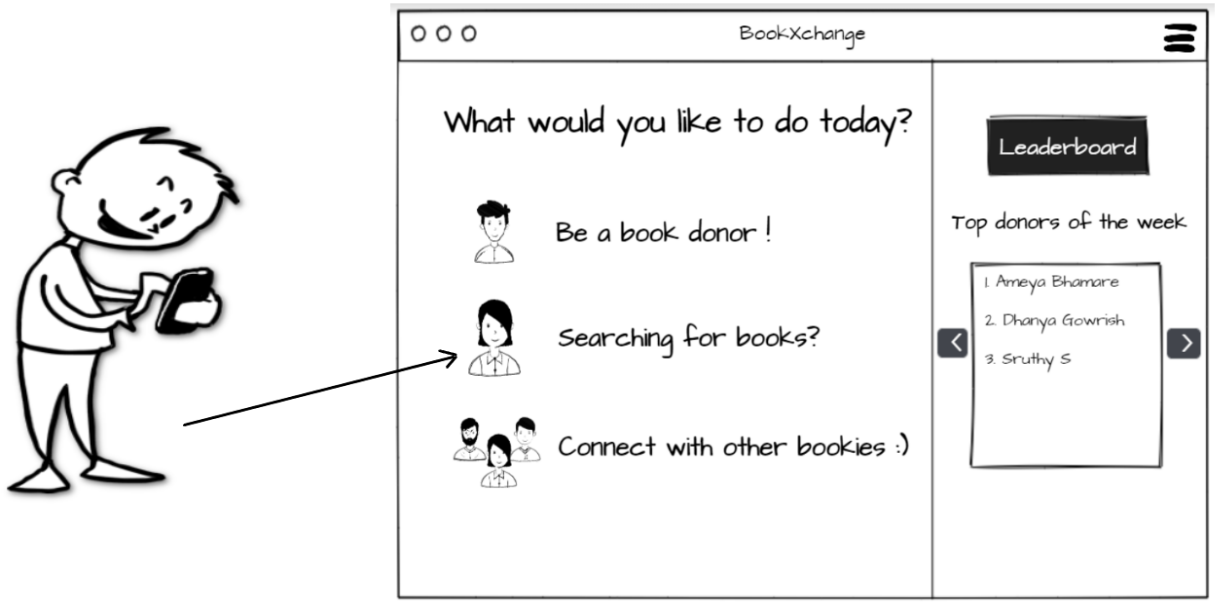
He wants a solution that will allow him to acquire free books for his education.

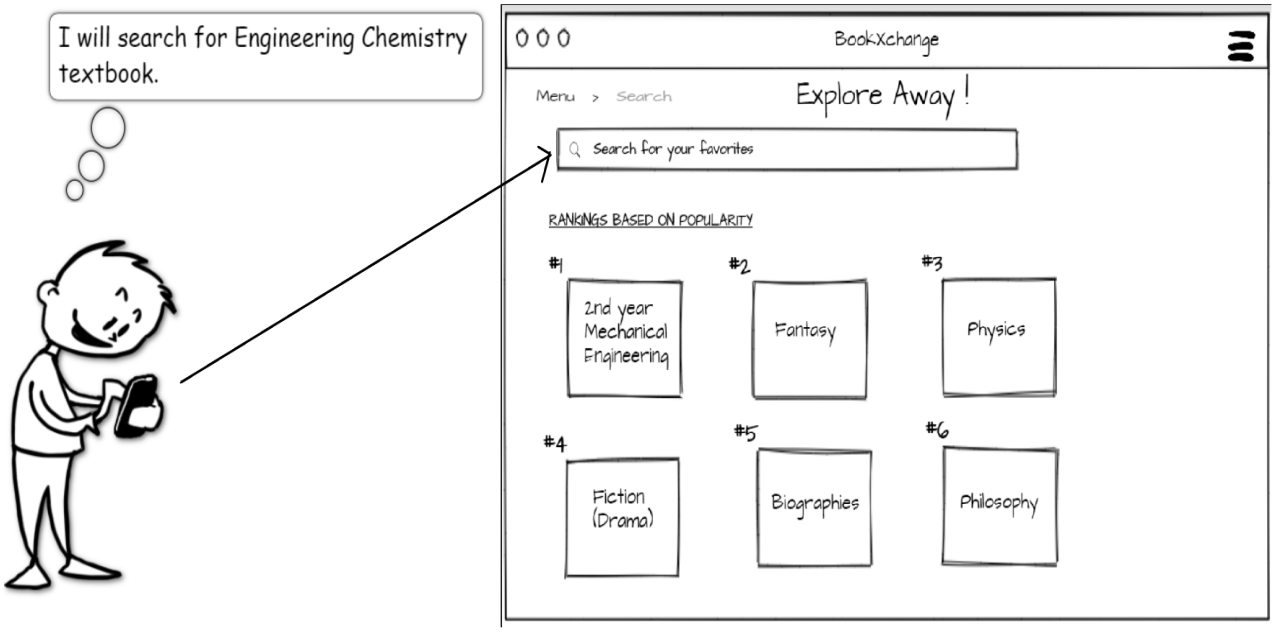
Rohan knows of the platform **Book Xchange** that allows users to acquire donated books

He decides to login to the platform and check to see if the textbook of his desire is available.



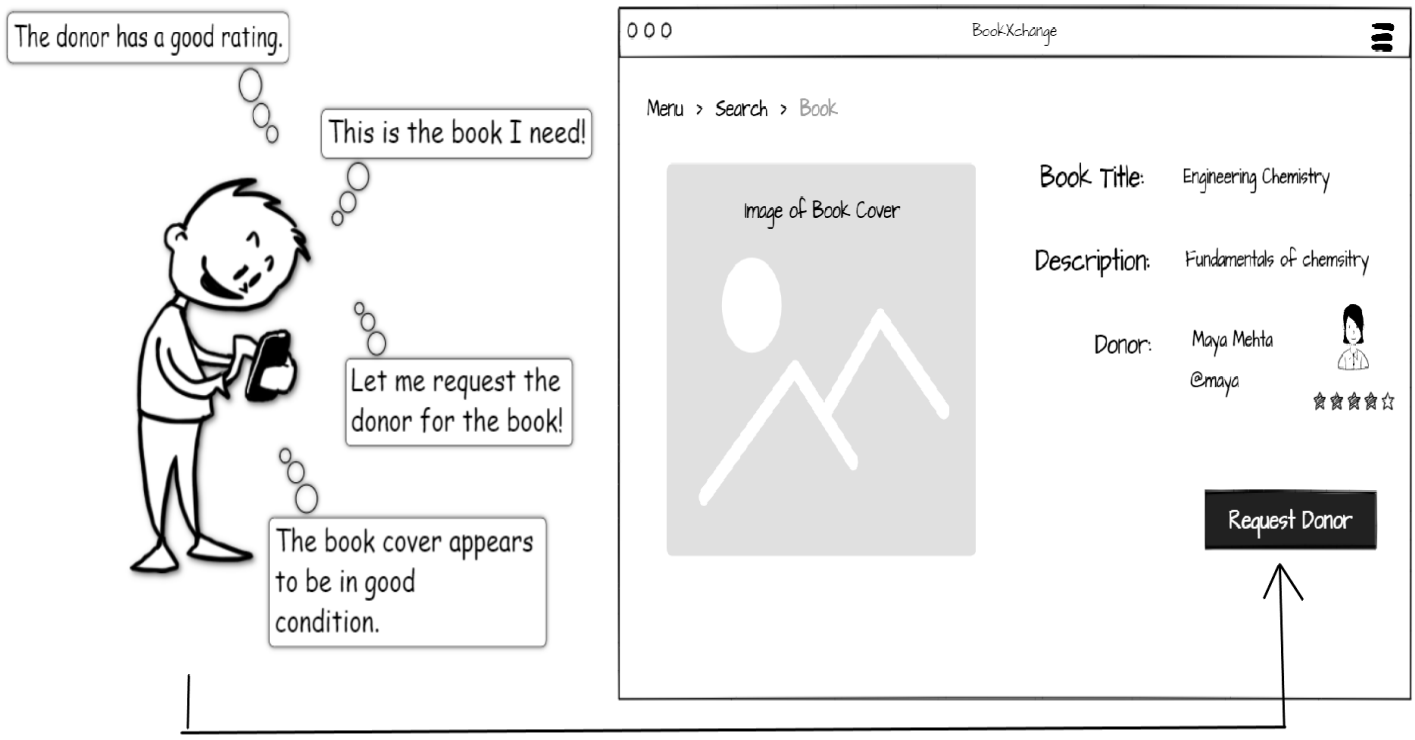
Rohan searches for the book by its title “Engineering Chemistry” to see if there are donations of this book available to acquire.





Rohan finds a donor who has posted about the book he desires. The donor Maya, has uploaded a picture of the book cover. Rohan assesses the trustworthiness by the donor's ratings and the condition of the book by the cover photo.

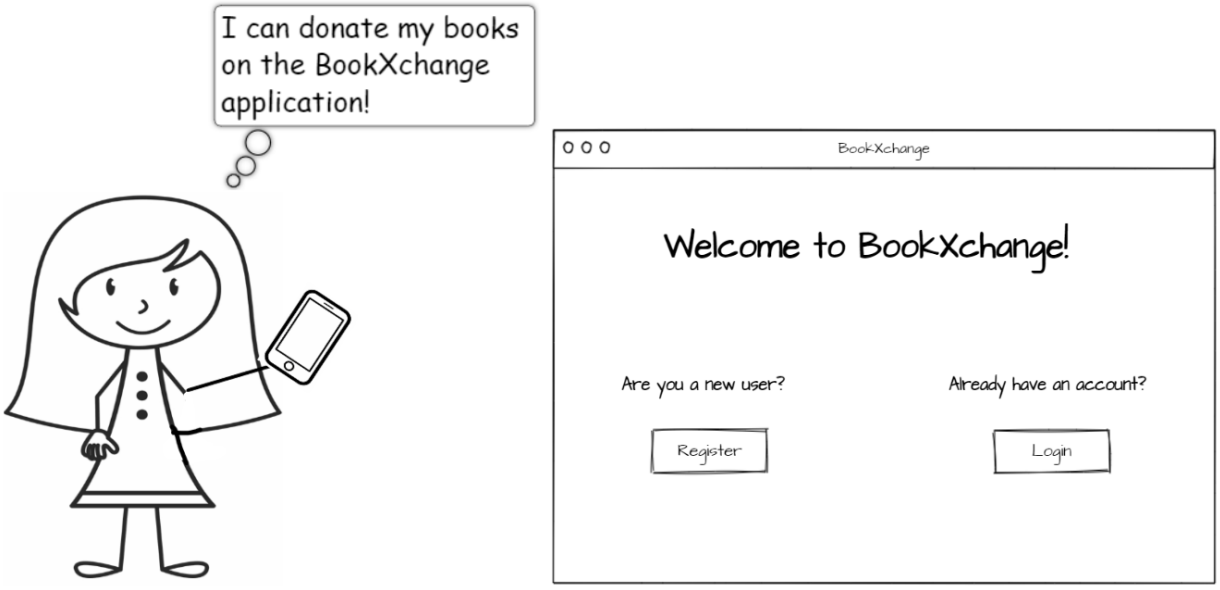
Rohan decides to send a request to the donor for the book.



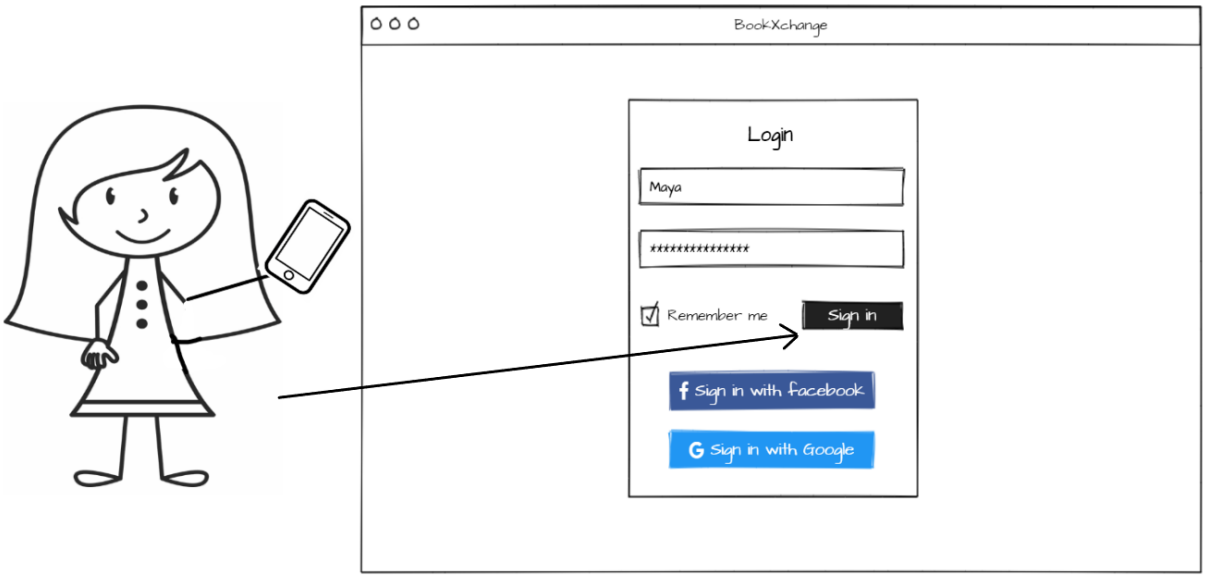
Meanwhile from Maya the donor's side…

Maya is a second year student at PES University. She has too many books from first year, which she no longer needs. She wishes to donate these books to a student in need.

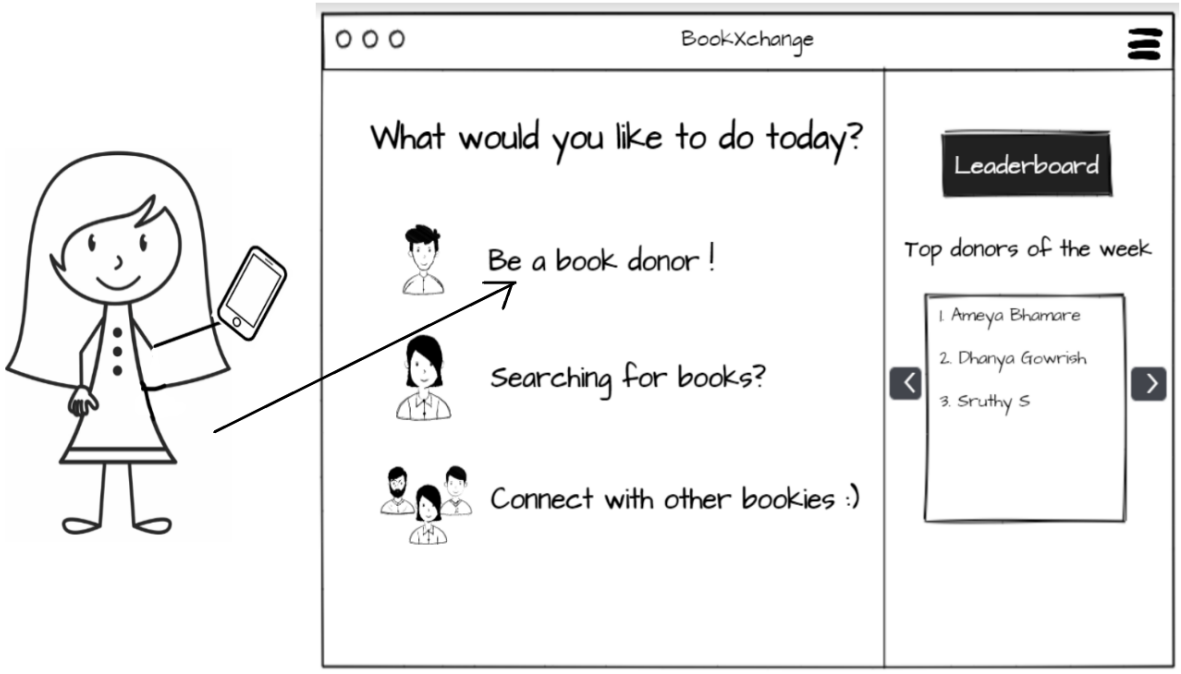
She knows of the platform **Book Xchange** that will allow her to post these books for donation.



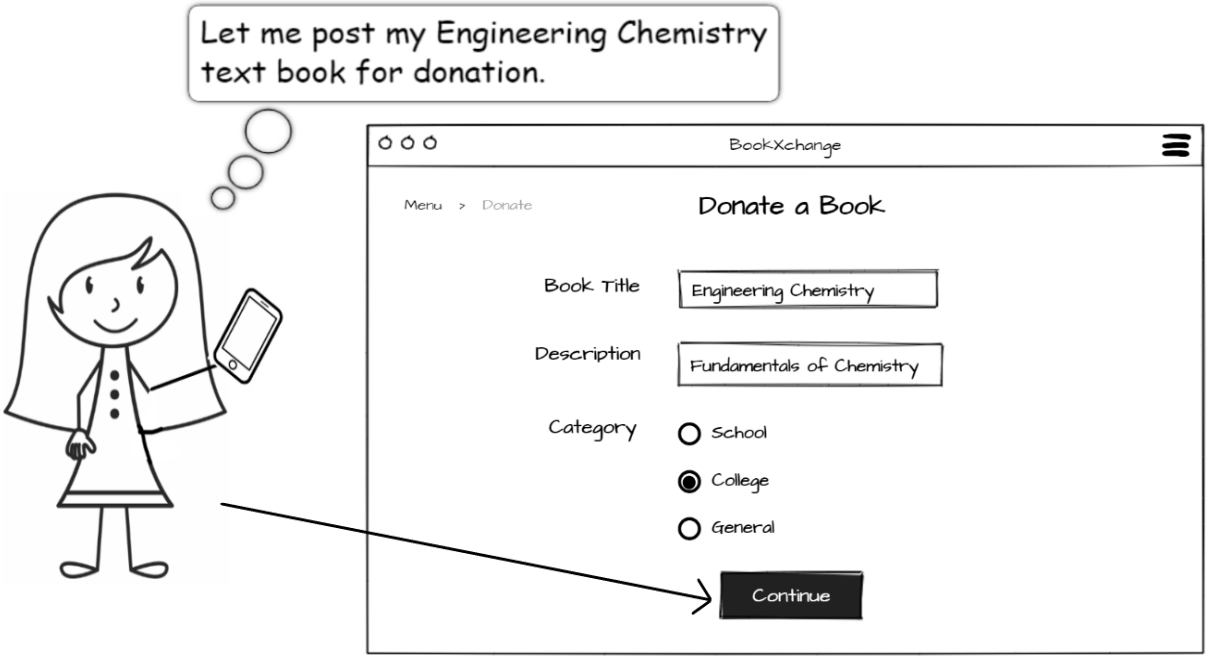
She logs in to the platform, to donate her “Engineering Chemistry” textbook from first year.



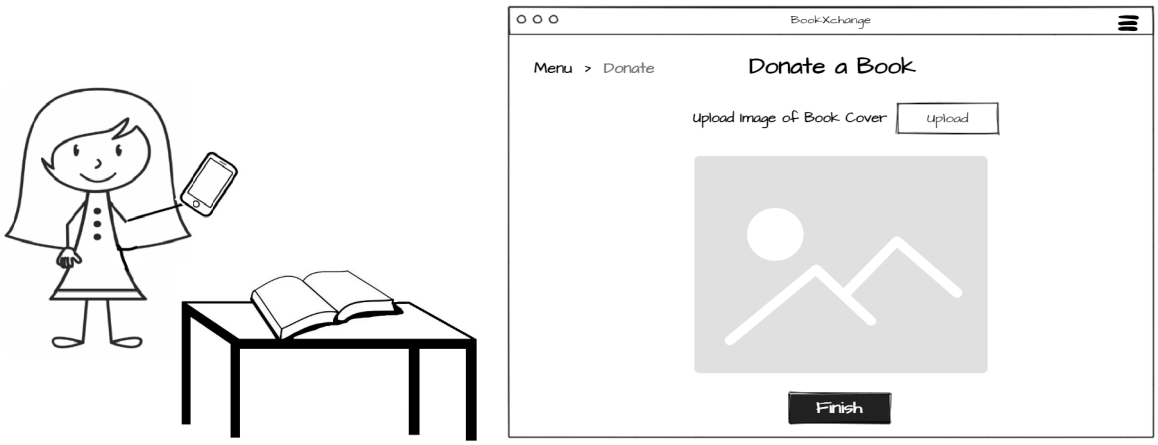
Maya wants to post a donation for the textbook on the platform.



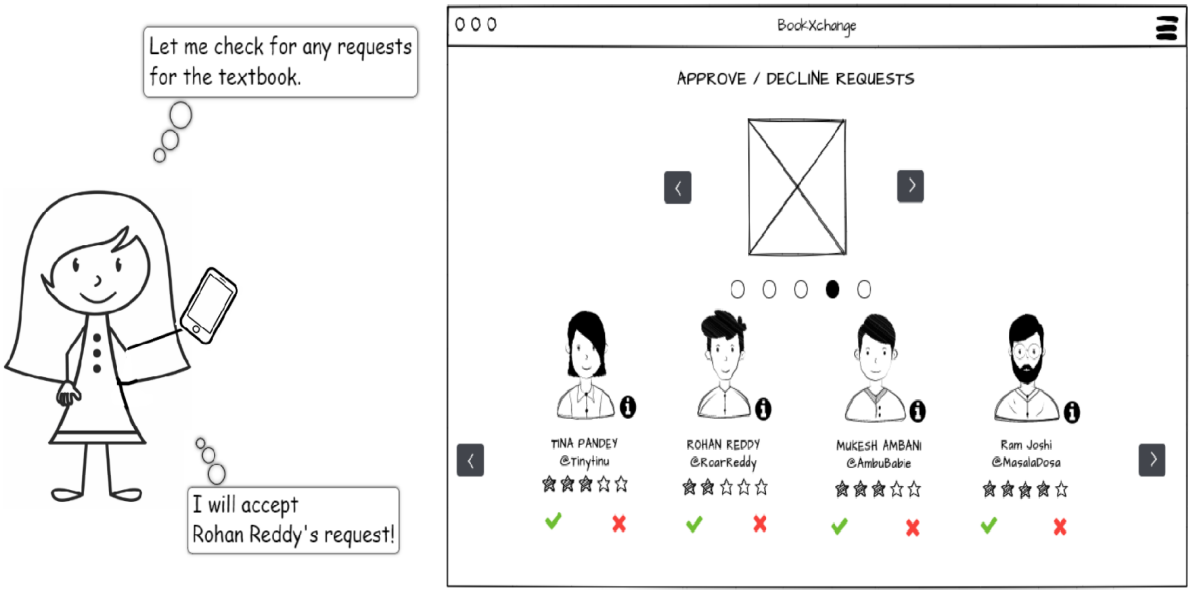
Maya then posts the details about the book she wishes to post about for donation.



Maya then uploads a photo of the book's cover. This will be an indication to users of the book's condition. This completes the process of posting the book for donation.

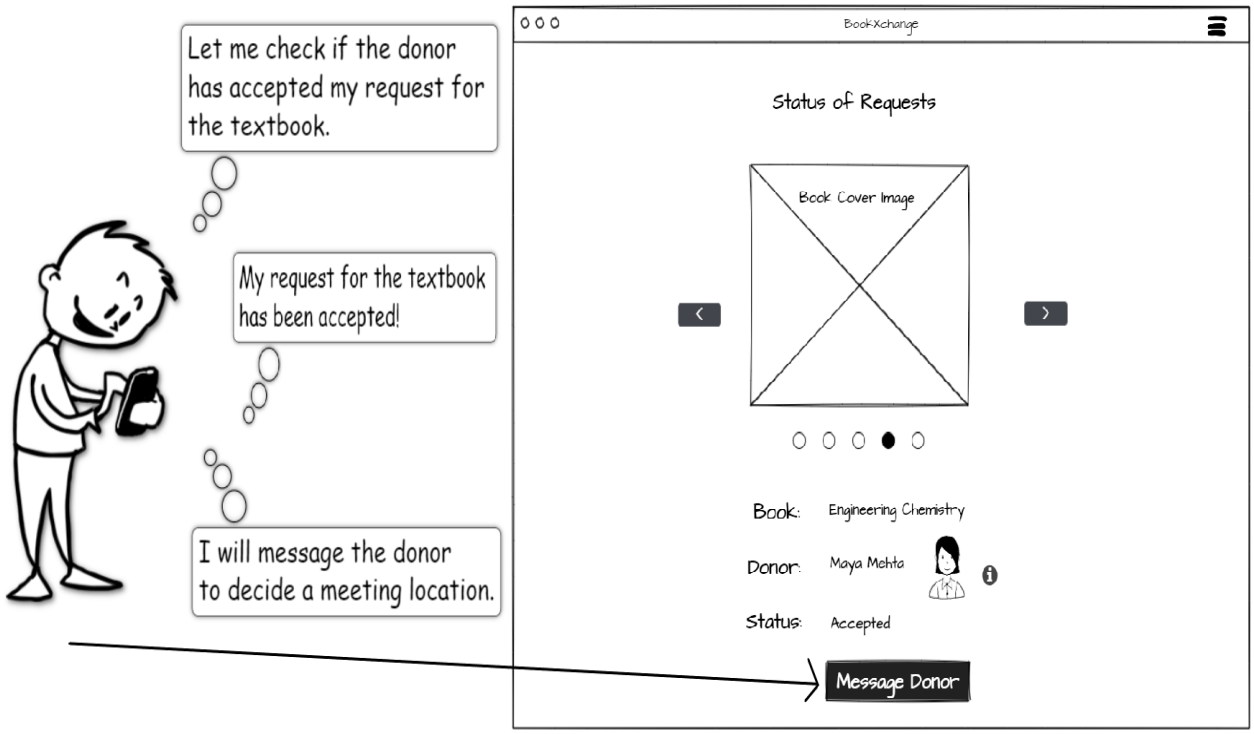


Maya checks the requests page to see if she has received any requests for her donation post for the “Engineering Chemistry” textbook. She accepts Rohan’s request for the book.

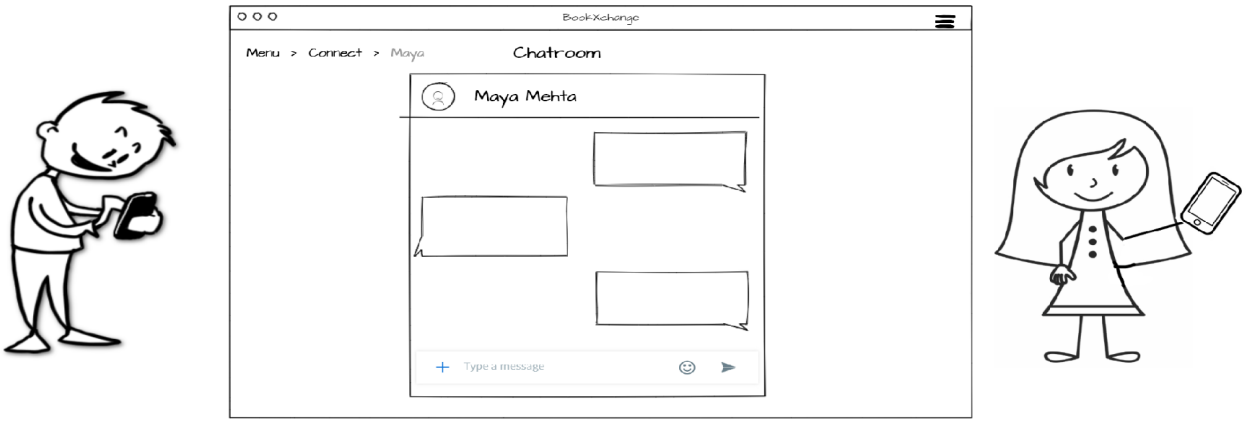


Now at Rohan the recipient's side..

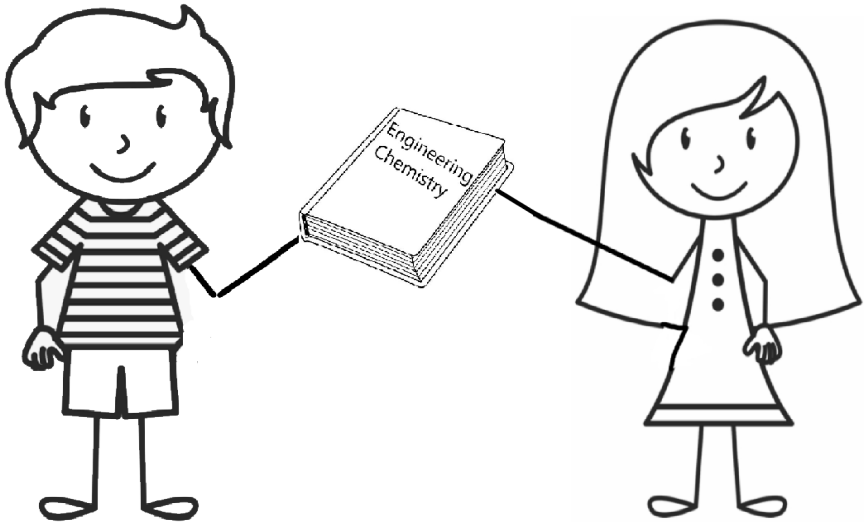
Rohan checks his requests page, to check the status of the request for the Engineering Chemistry textbook. He sees that the donor Maya has accepted the request, and decides to message her.

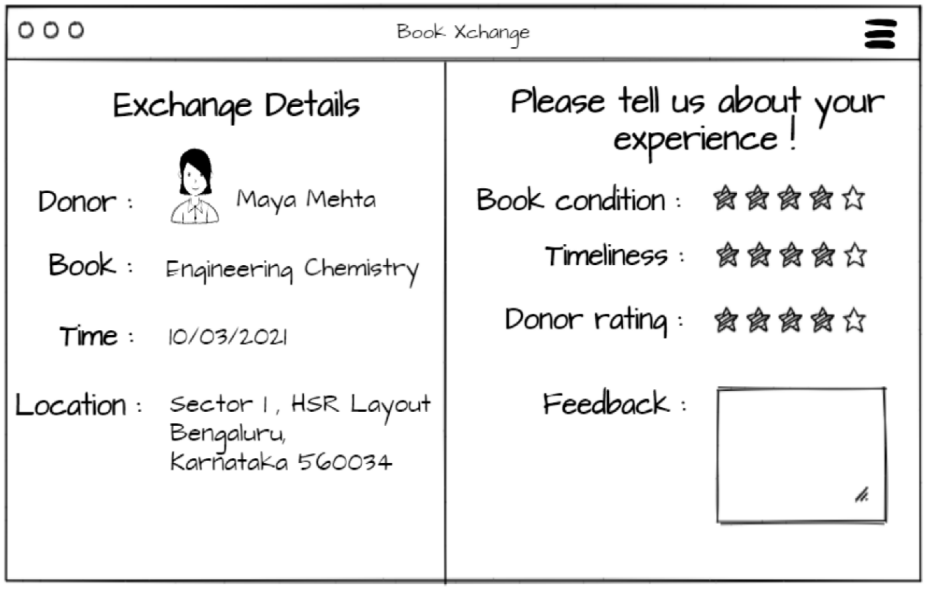


The recipient Rohan and the donor Maya, connect and decide the meeting location over chat.



Rohan and Maya meet in the agreed meeting location where they exchange the book “Engineering Chemistry”.





After receiving the book, the recipient Rohan, rates the donor Maya. He is asked to rate Maya as a donor, on **book condition, timeliness** and **overall donor rating** on a five-point scale. He is also asked for feedback for the donor.
