USE CASES

Use cases:

1) Find book - based on topic or title
A user who wishes to acquire a book can search for a book. The search is based on either the title or topic of the book. Example: Title based search - "Engineering Mathematics"
Topic based search - "Chemistry"

2) Chat
Chat with other users for networking purposes. The chat feature is secure and privacy is protected. The chat feature enables communication between book donor and recipient.

3) Exchange location
Book donors and recipients can mutually decide a meetup location to exchange book(s).

4) Groups based on common institution
Provides an option to search within donors of a particular group.

5) Offer/Acquire
Users can post a book they would like to give away. Users can also search and post requests for books they wish to acquire.

6) Rating the users

Every time a recipient receives a book, they can leave a rating for the lender on the basis of - book condition and book exchange experience.

7) Most trustable users
This feature lists the most trustworthy application users on the basis of their activity frequency and ratings received.
